

---

24. (Once Amended) A firearm device comprising:

a firearm;

a safety means for impeding an unauthorized person to fire the firearm; and

an information storage means for recording and storing at least one aspect of a group consisting of an image in the direction in which a shot is fired, and a sound at about the time when a shot is fired.

---

42. (Once Amended) The device of claim 24, wherein the information storage means is connected to at least one device of a group consisting of a digital camera for recording images, a microphone for recording sound, a timepiece for recording time, and a GPS for recording position in the form of geographical co-ordinates; and the information storage means is arranged to store data from the said at least one device.

---

44. (Once Amended) The device of claim 43, wherein the digital camera is mounted to face along the barrel defined by the firearm, thereby allowing it to record an image in the direction in which a shot is fired.

---

46. (Once Amended) A firearm device comprising:

a firearm; and

a safety means being characterized therein that it comprises an information carrier and gathering means defining an information carrier means separable from the firearm device whereon information can be recorded, and an information gathering means for gather information from the person to use the firearm; and the safety means further comprising processing means for processing information received from the information carrier and gathering means and
